

Hamza TAHRI

Backend Software Engineer | AI Champion

+212-649-612353 · contacthamza.tahri@gmail.com · hamzatahri.github.io

PROFILE

Backend software engineer specializing in cloud-native APIs and microservices with Java and Spring. Experienced delivering scalable services across IoT, analytics, and banking domains on GCP, AWS, and Oracle Cloud. AI Champion who promotes AI-assisted development practices and adoption across engineering teams. Strong foundation in DevOps, Kubernetes, and secure enterprise systems.

WORK EXPERIENCE

Backend Software Engineer | Renault Digital

2024 – Present

- **AI Champion:** promoted AI-assisted development practices and adoption across the engineering community.
- Built backend services for IoT and connected-vehicle platforms, enabling remote vehicle operations.
- Developed Java/Spring Boot APIs connecting cloud services with vehicle-side VKM systems.
- Supported cloud-native services on GCP/GCS and Kubernetes, with focus on scalability and reliability.
- Contributed to enterprise KMS and cryptographic services, including secure key management and cryptographic operations.

Backend Software Engineer | Oracle

2024 – 2024

- Led migration from Gradle 5 to 8 for a large-scale graph database system, improving build performance and maintainability.
- Developed and exposed new APIs on the Parallel Graph Analytics System (PGX), extending analytical capabilities.
- Collaborated with PGX and Data Studio customers to analyze, troubleshoot, and resolve critical production bugs.
- Authored design specifications and conducted code reviews to ensure architectural consistency and code quality.
- Performed benchmarking and competitive analysis to evaluate system performance and identify optimization opportunities.
- Mentored junior engineers on Gradle, Java, Oracle Cloud, and Linux, accelerating onboarding and technical growth.

Backend Software Engineer | SG-ABS

2022 – 2024

- Built cloud-native bridge and transformation gateways enabling communication between business APIs and the Amplitude core banking system.
- Designed and developed Cash2ATM functionality for Société Générale subsidiaries in Sub-Saharan Africa.
- Contributed to intraregional transfer functionality, including advanced fee and tax calculation.
- Led transformation of monolithic applications into microservices while preserving a cohesive end-user experience.
- Designed and implemented the Automated Payment System for External Bill Processing, improving payment processing efficiency.

EDUCATION

Software Engineer (IT) — ENSA Safi

2020 – 2022

Professional License (IT) — FSSM Marrakech

2019 – 2020

University Technology Diploma (IT) — EST Agadir

2017 – 2019

CERTIFICATES

OCP Java SE 11 — Oracle — 10/2024

AWS SAA — AWS — 12/2023

GCP Professional Architect — Google

HCIA Cloud — Huawei — 07/2020

CCNA — Cisco — 06/2021

SKILLS

Programming: Java, Python, JavaScript, C#, C++

Frameworks: Spring Boot, Spring Cloud, Spring Security, Spring Data, Spring Integration

AI: Agentic development, MCP, RAG, OpenCode, Copilot

DevOps: Docker, Jenkins, HashiCorp tools, Kubernetes

Databases: MySQL, MongoDB, PostgreSQL, Oracle

Code Quality: Sonar, PMD, JUnit, Mockito

Cloud: AWS, Oracle Cloud, GCP

Languages: Arabic (Native), English (Advanced), French (Advanced)

HOBBIES

Martial arts, swimming, diving, surfing, electronics and tinkering with electronic components
